- A bull that will add some frame size. The resulting calves will perform in the feedlot with added performance. The retained females have the genetics to be great as well.
- A carcass maker bull, he scanned a 13.9" Ribeye at Ultrasound, and a 12:1 Ratio for Marbling.
- His now deceased sire, **Scheckel Expedition A23**, was a big, extremely long 3,000 pound bull that had a very positive impact in our herd, a real growth bull that had sons tested at bull test stations around the country and always finished near the top. He had perfect feet and disposition along with it all.
- His dam, **Blackbird Ursa Scheckel E237**, a great young cow, who scanned 8% Marbling herself at Ultrasound. She is maintaining a tight calving interval in our herd and has raised some excellent calves.

THESE BULLS WILL IMPROVE YOUR CALF CROP THROUGH ADDED POUNDS AT WEANING, CARCASS TRAITS, AND MATERNAL VALUE ON HEIFERS RETAINED.
