SALE TERMS

This is a timed online-only auction at DVAuction.com. All lots will be open for bidding on Tuesday, November 21st and will end on Friday, November 24th, 2023 at 7 pm CST. If someone bids in the last remaining minutes, the end time will extend out until all final bid offs are finished.

J.J. Scheckel will contact you the Monday after the auction ends to send you an invoice and arrange payment and delivery.

If you need help bidding online at this sale, we are here to help! If you are unable to, or are unfamiliar with the DVAuction method, we can place a bid for you. Please contact Josh Scheckel at 563-590-9903 to arrange any bids as needed.

PAYMENT

We will accept check, cash, or credit card for payment.

FREE DELIVERY

We will offer free delivery on any animal selling, up to a 200 mile radius of Bellevue (Dubuque), Iowa. We will offer free delivery on any animal selling for \$7,500 and up, to any location in the U.S. After payment has been received we will deliver to a central livestock market, or sale barn of your choice that is open during regular business hours. At the time of delivery, you are then responsible for the care, feed, water, and pick-up of the cattle.

SIGHT UNSEEN GUARANTEE

If you purchase an animal sight-unseen, and for any reason are unhappy with your purchase upon delivery, we will refund your money 100%, provided you:
#1- turn cattle down at time of delivery, BEFORE delivery truck leaves site, or
#2- return the cattle uninjured to our farm yourself, no later than 3 days after delivery.

MORTALITY DEATH INSURANCE

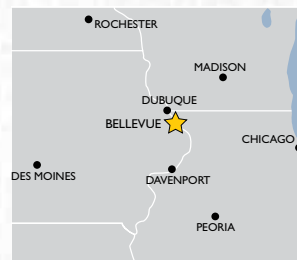

We offer full Bull Mortality and Accident Insurance, on any of the animals selling. This policy is through a partner company of ours, and generally costs 10-15% of the sale price of the animal. If interested, this needs to be purchased at the time payment is arranged post-auction, before delivery. Please let us know if you want this at time of invoicing.

VIEWING OF THE CATTLE

All cattle pictures and videos can be viewed on DVAuction.com. You are welcome to come and view the cattle in person at our farm, they are available anytime for viewing during business hours, Monday - Friday, 8 to 5. Please contact: Spencer Meyer at 563-542-9221, Kenny Lundin at 563-209-1375, or Josh Scheckel at 563-590-9903.

DIRECTIONS

If you are coming to view or pick up cattle, we ask that you come to our J.J. Scheckel office during business hours, located at 21582 Hwy 62, Bellevue, Iowa 52031. We will then have a rep take you to the farms and sale pens as needed.

CATTLE DEVELOPMENT

Since weaning, these cattle have been on a slower-growth, high-fiber based program consisting of free range pasture, corn silage, alfalfa hay, vitamin ADE, and free choice salt and minerals. We do not feed a finishing corn based diet to our developing seedstock.

PARENTAGE VERIFICATION & GENETIC DEFECT-FREE

Each animal selling is DNA tested and 100% parentage verified using Zoetis 50K, Neogen, or Angus GS DNA. Each animal selling is free and clear, by pedigree, of any known genetic defect.

HOW TO BID ONLINE

TO BID ONLINE:

Please register early!

1. Go to www.dvauction.com.
2. Click Create New Account on the top left of the webpage.
3. Enter your email and create a password.
4. Complete your contact and banking information.
5. Select your time zone, accept the terms, and click Create Account.
6. Complete the process by answering a few questions and setting up your subscription preferences.
7. You'll receive an email from DVAuction, click the link in the email to activate your account.
8. Find J.J. Scheckel Angus under the Production Sale Videos link in the upper left.
9. Click on Apply for Bidding.
10. DVAuction will contact you once you've been approved to bid.

DVAuction.com

PLEASE NOTE:

- If you have any questions, please call DVAuction at 402-316-5460. A friendly person will answer the phone and be glad to help you!
- After placing your bid, check back later to make sure you weren't outbid.
- Bidding closes Friday, November 24th at 7:00 pm CST, and the sale automatically extends a few minutes anytime a bid is placed in the final minutes.
- High speed internet access is required to bid successfully during the sale.

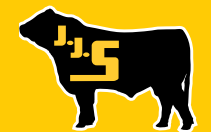

PROXY BIDDING:

There is an option (not required) to place your maximum bid on a bull, and the system will bid for you (only if you are outbid) up to the limit that you specify.

NEED HELP BIDDING ONLINE AT THIS SALE??

We are here to help! If you are unable to or are unfamiliar with online auctions or the DVAuction method, we can place your maximum bid for you.

Let us help! Please contact:
SPENCER MEYER at 563-542-9221
JOSH SCHECKEL at 563-590-9903

FIRST BREEDING SEASON WARRANTY

There is no question bulls are prone to injury. Every bull we sell comes with a First Breeding Season Warranty. A breeding season is defined as 60 days after first turnout. We do this to maintain 100% satisfaction and fairness with our customers. This means the bull you purchase will be warrantied if he is found to not be a satisfactory breeder by a vet. This includes a broken penis, severe lameness, or any injury that prevents him from being able to breed your cows.

We operate on the honor system, offering an easy resolution to injured bulls. After we receive your vet confirmation of injury, you send the injured bull to kill market yourself, providing us with the receipt. We will place a credit on your account for future sale purchases in the amount you paid for the bull at our sale, less the salvage value from the kill market. This is not a cash back situation; this is a credit that will be on your account here for future sale purchases.

To qualify for the warranty, we must first be notified of the problem. Your vet will need to call us for the reason of injury, and the bull must be alive for this warranty to be in effect. We cannot cover or warranty a dead bull for any reason whatsoever, you will want to purchase outside mortality insurance if you wish to protect yourself from a dead bull for any reason.

What this warranty means to you, is that we are trying to be as fair and good as we can to our customers. We want happy repeat customers.

RETAINED OWNERSHIP

J.J. Scheckel reserves and retains one-half revenue sharing semen interests on each bull selling. Full possession and full salvage value stays with the buyer unless otherwise noted.

POWER in the BLOOD!

Welcome friends and fellow cattlemen.

We again, humbly welcome you to our 2023 Annual Production Sale! The theme this year is *real substance*. In a world of smoke and mirrors, flashy marketing, edited pictures, and relying upon EPD numbers alone, we want to assure you that our seedstock operation is still putting in the *real actual work*.

We still perform intense and complete Angus herd improvement records, measurement data, and guidelines on our herd, including: real birthweights, real weaning weights, real yearling weights, real carcass ultrasound scans for marbling, fat, and ribeye size, real scrotal measurements, real hip heights, real udder scores, real feet scores, real temperament scoring, real production records on cows, and so much more! This takes a lot of real work and commitment. Furthermore, along with these *real measurements* we perform, every single animal we own is DNA tested for parentage verification and full panel performance tested via DNA as well to increase EPD accuracy.

We cull extremely hard for any animal in our herd that has displayed poor feet, poor udders, poor temperament, and poor fertility, period. We can honestly say that after 16 plus years of aggressively growing our registered herd, and culling extremely hard year after year, every single animal still breeding and walking on our farm has earned it the old fashion way. We have as solid and sound of a herd as we have ever had and are proud of the herd we have built. We did this through real work. There is no substitute to boots-on-the-ground, real measurements, and time.

All of our sale pictures in this catalog are 100% real, no photoshop, no grooming, no clipping!

The J.J. Scheckel Angus program has always strictly focused on breeding, promoting, and improving, a type of power-cow that is of super high-capacity: big-barrelled, big-boned, big-footed, extra-wide, long, thick, and deep, while being balanced in her look and possessing original Angus breed character. She is solid and sound, she possesses the perfect udder, perfect feet, easy fleshing, all in a moderate frame size. These are the kind and type of base cows that stand up in our tough environment, while delivering the extra thick and heavy-weight calves we seek, and our customers seek, at weaning and beyond.

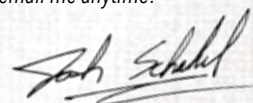

The breeding bulls created from our cow herd will go on to make calves for our commercial cattlemen customers, that will wean extra pounds, then go to the feedlot, and perform among the top in the industry on both gain, and grade, with the genetic ability to meet high-quality standards and earn premiums for our customers.

The heifer calves retained from these breeding bulls will carry forward the genetics to replicate these traits of economic importance in ensuing generations to come.

To move the needle forward for real improvement, we must realize that everything created, for generations to come, is a by-product of that seedstock cow. She has got to be nothing less than great in all the relevant traits of importance. This is more than numbers, more than growth alone, more than carcass alone, more than milking ability alone. She has to be the complete balanced package that earns herself a high-ratioing production record of success the old fashion way. This game is still won year after year on the pasture.

If you want to improve your own herd, we feel its important to look at seedstock outfits that are putting in the real work and rooted in real substance.

Thanks for looking at our program and if you ever need anything, don't hesitate to call, text or email me anytime!

Josh Scheckel

OUR BREEDING PROGRAM

Power in the Blood!

SELLING TO COMMERCIAL CATTLEMAN IS OUR BUSINESS!

We breed and sell bulls specifically built for the real-world commercial cattlemen who are looking to improve their future calf crops. We primarily sell developed bulls that average 18 months old. These bulls will weigh more than young yearlings, and will be able to breed 18 to 24 head of cows their first year in service. We strive to develop these bulls slowly and correctly, so they hold up for long term use. At any point in the 18 month growth cycle, these bulls are culled if they possess bad feet, bad temperament, bad performance, or any trait we would not like to pass on to our customers.

All bulls are fully registered with the American Angus Association, and will have: actual birthweight data, weaning and yearling weight data, carcass ultrasound data, hip heights, scrotal measurements, breeding soundness exam, full panel DNA tested, current EPD's, and more. Because of this, we feel these bulls present a **superior value to our customers**. They will hold condition better than a yearling bull.

These bulls have been held by us long enough where we can get all the carcass ultrasounds and yearling measurements performed at our place – this data helps steer our breeding program, and if we sold yearlings we would not be able to capture this data.

In short, we do all of this for you, our customer. We want nothing more than to provide **cost efficient and superior genetics** that improve your own herds, make you happy, and keep you coming back for more.

OUR HERD GOALS, OUR PROGRAM DIRECTION

Our cattle are bred for commercial customers who sell cattle by the pound! Performance cattle capable of: **high growth, big weaning weights, high carcass value, maintaining moderate frame size, superior maternal traits, easy fleshing, excellent bags, feet, and temperament.**

We target a frame size of 5.5 to 6.5 size bull that will mature at 2,500 plus pounds, and a moderate frame cow that will weigh 1,600 plus pounds through her extra length, mass of body, capacity, and overall volume.

We find these cattle to ideally suit our environment and feed resources here in the Midwest. This seedstock creates the kind of feeder cattle the market desires for both **high growth and high grade**, while at the same time, leaving the big, long, deep bodied replacement females that display a wide pelvis for easy calving, while also having the eye appeal that cattlemen love universally.

THANK YOU!

We would like to say thanks to all our vendors, veterinarians, and support employees who help with the Angus business.

I would like to especially thank full time farm employee, **Kenny Lundin**. He does a fantastic job, works 7 days a week, and always has a great attitude. I could not operate the Angus business at this level without him.

Another thank you goes to **Steph Medinger**, who handles our office records and paperwork.

We have recently added **Spencer Meyer** to our program; he will help grow our program into the future.

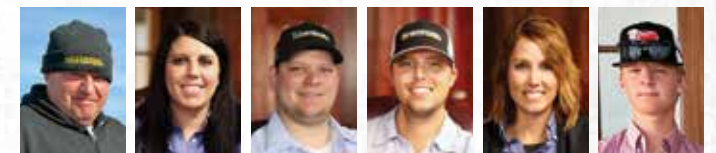

Thanks to **Matt Meyer**, who is integral in helping process new calves and chute work as needed.

Thanks to **Kristy Howell**, who performs all of our graphic design, and website creation and updating.

Thanks to **Maverick Scheckel**, who helps around the farm and chute work as needed.

Josh Scheckel

Kenny Lundin Steph Medinger Spencer Meyer Matt Meyer Kristy Howell Maverick Scheckel

Bull Test Stations REAL WORLD VALIDATION

We believe in openly testing our genetics with other purebred breeders around the country. That's why we send so many bulls to bull test stations located across the United States. These tests give a baseline comparison of what the bloodlines are capable of in terms of genetic performance. Besides weight gain, the tests are looking at carcass quality, confirmation, scrotal size, temperament, and semen quality.

We regularly send bulls to the following test stations:

- **MIDLAND BULL TEST IN MONTANA**
the largest, and most prestigious in the country
- **TREASURE BULL TEST IN MONTANA**
- **NORTH DAKOTA ANGUS ASSOCIATION TEST**
- **ST CROIX BULL TEST IN MINNESOTA**
- **IOWA CATTLEMEN'S ASSOCIATION BULL TEST STATIONS**
- **IOWA ANGUS ASSOCIATION BULL TEST**

MIDLAND BULL TEST

This is the largest feed efficiency bull test in America using computerized tags and weighted feed bunks.

2021 WINNING HIGHLIGHTS

★ **1ST PLACE CHAMPION EFFICIENCY BULL**
JJ SCHECKELS *Big Spread* H826

19% More efficient than the test average, while also maintaining a Top 10 Average Daily Gain ratio, being 21% higher than the test average.

★ **#1 HEAVIEST BULL OF GROUP 2**
JJ SCHECKELS *Duke* H810

Weighing 1,500 pounds, this bull was also Top 5 in ADG, and Top 10 in Efficiency, and he had the #3 largest scrotal of the bull test.

★ **#2 LARGEST SCROTAL MEASUREMENT**
JJ SCHECKELS *Ten Four* H828

MIDLAND BULL TEST

2020 WINNING HIGHLIGHTS

★ **HIGHEST DAILY GAIN RATIO OF 110**
JJ SCHECKELS *Paycheck* G610

10% Higher than the test average.

★ **HIGHEST INDIVIDUAL FEED EFFICIENCY RATIO**
JJ SCHECKELS *Paycheck* G610

Ratio of 106, or 6% more feed efficient than the test group average.

This bull had a Feed Conversion Ratio of 4.79, this means it only took 4.79 pounds of feed to add 1 pound of gain.

★ **HIGHEST WEIGHT PER DAY OF AGE RATIO**
JJ SCHECKELS *Bardolier* G659

Ratio of 116, or 16% heavier than the test average.

2019 WINNING HIGHLIGHTS

★ **1ST PLACE**
Weight Per Day of Age, Sire Group of 3.
Ribeye size, Largest against 697 bulls.

★ **2ND PLACE**
Average Daily Gain, Sire Group of 3.
Daily Gain Individual, against 697 bulls.

★ **3RD PLACE**
Midland Bull Test Index, Sire Group of 3.
Ribeye size, against 697 bulls measured.

- *All bred to Millars Duke 816, confirmed due to calve February 3rd.*
- K301 is a full flush sister to **Blackcap May Scheckel K306**, also selling in this sale.
- WOW! A collector's piece here of legendary foundation genetics going back in time, the one and only sire, **DHD Traveler 6807**, mated to our #1 donor.
- K301 showed pure performance at every measure: weaning weight, yearling weight, ultrasound, and breed up. She is as good as you can make one, and the type and kind we strive for in our program.
- Her sire, **DHD Traveler 6807**, has solidified his place in Angus history as one of the very best sires of all time. His daughters possess extra volume, power, and fleshing ability in a moderate frame size. They possess high fertility, and excellent udders. **DHD Traveler 6807** is deceased with very limited and hard to find semen availability.
- Her dam, **Blackcap May Scheckel D4136**, has proven to be one of the best full sisters ever created to the 10 million dollar producing breed legend, **SAV Blackcap May 4136**. D4136 produces top weaning weight calves every year, has sent several sons to Midland bull test with off-the-chart's performance, and is leaving beautiful producing daughters. The quality is locked on here!

- **All bred to Coleman Rock 7200, confirmed due to calve February 3rd.**
- K332 is a twin with her sister, who is selling as K333. She has top 1% Neogen DNA Profile out of 1.4 million others in the DNA database for four traits: weaning weight, yearling weight, carcass weight, and mature weight. This is super rare to achieve if you're into the numbers.
- Her sire, **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- Her dam, **Blackbird Scheckel H779**, is a fertile cow in our herd. She comes from the foundation blackbird cow in our herd, **Spruce Mtn Blackbird 2078**, who we purchased for \$25,000 at the Denver Stock Show years ago.

- All bred to *Connealy King Air*, confirmed due to calve February 3rd.
- K350 is as good as we can make one, she is awesome.
- Take a look at her unique pedigree, you will not find this exact mating anywhere in the world except for right here.
- Her sire, J.J. Scheckels Young Gun H814, is full brother in blood to major AI bulls, *SAV President*, *SAV Rainfall*, and *SAV Raindance*. He was bred and raised by us, and took #1 weaning weight bull in our program in 2020 at 904 pounds. He went on to ratio a 132 for IMF and 110 for ribeye at carcass ultrasound.
- Her dam, *Blackcap May Scheckel H707*, is a beautiful young cow in our herd. She weaned at 775 pounds and went 1,103 pounds at 365 days. She went on to scan a 13.5" ribeye to ratio 115 at ultrasound. H707 is a direct daughter of *SAV Blackcap May 8980*, who is a full sister to the 10 million dollar breed legend, *SAV Blackcap May 4136*.

- *AI bred to Millars Duke 816, confirmed due to calve February 3rd.*
- K307 has an excellent phenotype, lots of thickness and muscle you would expect with this mating. She is a solid foundation to build a herd around.
- K307 showed excellent personal performance at every measure: weaning weight, yearling weight, ultrasound, and breed up.
- Her sire, **SAV Resource 1441**, one of our all-time favorite bulls ever. Resource injects muscle and mass into his offspring like no other, he improved feet and fleshing ability, he sires moderate framed cattle that have high weaning weights and feedlot performance. We have used him extensively in our program.
- Her dam, a high value donor cow of ours, **SAV Emblynette 5454**, is full sister to major AI bull, the \$400,000 selling, **SAV International 2020**. She is the foundation Emblynette donor in our herd, she is super thick, long, and deep, her offspring display above average power in a moderate frame. Her personal offspring production record has a weaning ratio of 132, and a yearling ratio of 114.

- *AI bred to Millars Duke 816, confirmed due to calve February 3rd.*
- K314 has thickness, length and depth, all while scanning a top carcass at 12.2" ribeye and 7.48% marbling!
- Her sire, **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- Her dam, **Barbara K Scheckel H738**, is a young and excellent producing cow in our herd so far. She is a **SAV Allegiance** daughter, a bull owned by us that is making some of the best females in our program as they are stunning in presence, displaying thickness, extra depth and length. H738 herself is injecting this phenotype into her offspring as well. Also of note, H738 had an amazing carcass ultrasound of 12.5" ribeye at 8.87% IMF!

LOT #17 BLACKCAP MAY *Scheckel* K344

Birth date 4/04/2022 | Reg # 20436370 | Tag # K344

SAV Quarterback 7933 — SAV Regard 4863
 SAV Prescott 9653 — SAV Blackcap May 3525
 — Coleman Charlo 0256
 SAV Blackcap May 6644 — SAV Blackcap May 4136
 — SAV Harvester 0338
 SAV International 2020 — SAV Emblynette 5483
 Blackcap May Scheckel G515 — SAV Adaptor 2213
 — SAV Blackcap May 4553 — SAV Blackcap May 4136

- *All bred to Connealy King Air, confirmed due to calve February 3rd.*
- K344 is a beautiful bred heifer with Schaff breeding on top and bottom of the pedigree.
- Her sire, **SAV Prescott 9653**, came from the #1 leadoff bull group at the 2020 Schaff Sale, and has served as a J.J. Scheckel herd bull since. He had an individual weaning weight of 900 pounds and yearling weight of 1,406 pounds. He scanned a ribeye size of 15.7" and a 118 ratio for IMF.
- Her dam, **Blackcap May Scheckel G515**, is a powerful **SAV International 2020** daughter out of our former donor cow, **SAV Blackcap May 4553**, who we sold for \$25,000 at a past production sale.

- TC Aberdeen 759
- Mohnen Jilt 787

- **AI bred to Coleman Bravo 6313, confirmed due to calve February 3rd.**
- K360 is another growth heifer who earned a 104 ratio for weaning weight, and 103 ratio for yearling weight. She also went on to scan a 110 ratio for ribeye size at ultrasound. She has top 5% in the industry DNA profile for weaning weight, yearling weight, carcass weight, and mature weight.
- Her sire, **SAV Deep Water 8260**, is a resident herd bull that came to us through the 2019 SAV sale where he was the #1 weaning weight bull of the entire natural calf crop at SAV of over 600 bulls. He weighed 1,066 pounds at 205 days of age to ratio 119 against the highest competition of contemporary group pen mates in the business. He is a 6.5 frame power bull with a massive length of body.
- Her dam, **Jilt Scheckel G519**, is a direct daughter of the foundation Jilt in our herd, **Mohnen Jilt 539**, who is a legendary cow also known as the mother of major AI bull, **Mohnen South Dakota 402**.

BRED HEIFERS

LOT #30 LADY *Scheckel* K359

Birth date 4/18/2022 | Reg # 20436943 | Tag # K359

- SAV Raindance 6848 — Coleman Charlo 0256
- SAV Deep Water 8260 — SAV Blackcap May 4136
- SAV Elba 2538 — SAV 707 Rito 9969
- Vermilion Dateline 7078 — SAV Elba 1094
- Lady Scheckel C37 — Connealy Dateline
- R B Lady Equator 302-839 — Vermilion Blackbird 5044
- G D Lady Hi Flyer 302 — Papa Equator 2928

- All bred to Coleman Bravo 6313, confirmed due to calve February 3rd.
- K359 is another big time growth heifer who earned a 115 ratio for weaning weight, and 110 ratio for yearling weight. She also went on to scan a huge 126 ratio for ribeye size.
- Her sire, SAV Deep Water 8260, is a resident herd bull that came to us through the 2019 SAV sale where he was the #1 weaning weight bull of the entire natural calf crop at SAV of over 600 bulls. He weighed 1,066 pounds at 205 days of age to ratio 119 against the highest competition of contemporary group pen mates in the business. He is a 6.5 frame power bull with a massive length of body.
- Her dam, Lady Scheckel C37, is a cow bred and raised on our farm that now has a record of having five calves for us with an average birthweight of 83 pounds, and a ribeye ratio of 5 @107 for her offspring at ultrasound.

- Basin Payweight 1075
- R B Lady Net Worth 308-032

- All bred to Connealy King Air, confirmed due to calve February 3rd.
- K342 is a big time growth heifer who earned a 119 ratio for weaning weight, and 118 ratio for yearling weight. She also went on to scan a huge 126 ratio for IMF marbling.
- Her sire, JJ Scheckels Big Spread H826, is our bred and raised herd bull that has proven himself as he went to Midland Bull test and won Champion #1 Efficiency Bull, while also scoring in the top 10 for growth out of over 600 others in competition. He ate less, and gained more than any other bull in the competition, which is the largest 3rd party bull test in the United States. Efficient gain is where profits are made; He does it better than any.
- Her dam, Lady Scheckel H736, is another SAV Ignitor daughter in our herd, transmitting the performance of her sire.

- **AI bred to Coleman Rock 7200, confirmed due to calve February 3rd.**
- K317 came light at a 65 pound birth weight, she gained well and scanned 8.10% marbling at ultrasound!
- Her sire, **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- Her dam, **Emblynette Scheckel H742**, is a young producing cow in our herd. She is a SAV Igniter daughter - he is a bull owned by us that sires performance. H742's dam is another foundation Emblynette cow in our herd from Schaff Angus Valley, **SAV Emblynette 4075**.

 — SAV May 2397

- **AI bred to Millars Duke 816, confirmed due to calve February 3rd.**
- K305 showed performance at every measure: weaning weight of 601 pounds, yearling weight of 1,028 pounds, and she ultrasounded a 12.1" ribeye and 6.53% IMF. She also went and bred up on first round AI.
- Her sire, **SAV Deep Water 8260**, is a resident herd bull that came to us through the 2019 SAV sale where he was the #1 weaning weight bull of the entire natural calf crop at SAV, weighing 1,066 pounds at 205 days of age, to ratio 119 against the highest competition of contemporary group pen mates in the business. He is a 6.5 frame power bull with massive length of body.
- Her dam, **SAV Blackcap May 4553**, is a past J.J. Scheckel donor cow and direct daughter of the legend, **SAV Blackcap May 4136**. We sold her for \$25,000 at a past production sale. She was one of the best to walk our farms. She possessed a unique pedigree and picture perfect phenotype; her calves always rose to the top in earned production data.

BULLS

LOT #40 JJ SCHECKEL Full Send K905

Birth date 2/04/2022 | Reg # 20437634 | Tag # K905

- K905 is a special bull, he can't be recreated anywhere else in the world. He locks on the best of the proven past, with the best of today. He has lots of muscle expression and dimension.
- His sire, **JJ Scheckels Duke H810**, "Some talk it, he did it". **H810** is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- His dam, **Camilla May Scheckel H760**, has an interesting back story, this bloodline is not recreated or attainable anywhere else in the world. We created her by sourcing the rarest semen to be found from the 1960's on the famous legendary angus bull, **Camilla Chance 37T**, also known as the Canadian Colossal. We made this rare one off mating to mix the best genetics of the past, with the best of today's genetics. H760's dam, **Blackcap May Scheckel D4136**, our lead varsity donor cow, has proven to be one of the best full sisters ever created to the 10 million dollar producing breed legend, **SAV Blackcap May 4136**.

- K929 is a low birthweight EPD bull that will work on heifers. He is J.J. Scheckel designed to make the type of feeder cattle the industry demands with extra muscle, length, performance, and yield.
- His sire, SAV Stockade 8900, was a J.J. Scheckel owned herd bull and direct son of breed legend SAV Blackcap May 4136. He is full brother to AI bulls SAV Sensation and SAV Seedstock. 8900 was an aggressive breeder for us, siring top weaning weight calves and leaving us with awesome sons and daughters in our herd.
- His dam, Lady Scheckel G518, has two calves on record with an average birthweight of 78 pounds. She is a direct daughter of one of the best cows to ever walk our farm, RB Lady Net Worth 308-032, who served as an absolutely massively thick and powerful donor cow for us.

- K932 is a bull that earned above average weaning weight and yearling weight ratio measurements. He is J.J. Scheckel designed to make the type of feeder cattle the industry demands with extra muscle, length, performance, and yield.
- His sire, JJ Scheckels Duke H810, "Some talk it, he did it". H810 is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- His dam, Madame Pride Scheckel H767, is a highly productive young cow. She has two calves on record with average birthweight of 74 pounds, weaning ratio of 105, yearling ratio of 102, IMF ratio of 120, and ribeye ratio of 110.

LOT #56 JJ SCHECKEL *Top Hat* K937

Birth date 4/08/2022 | Reg # 20438290 | Tag # K937

- K937 is a big time performance bull that earned above average weaning weight and yearling weight ratio measurements. He is J.J. Scheckel designed to make the type of feeder cattle the industry demands with extra muscle, length, performance, and yield.
- His sire, **SAV Deep Water 8260**, is a resident herd bull that came to us through the 2019 SAV sale where he was the #1 weaning weight bull of the entire natural calf crop at SAV, weighing 1,066 pounds at 205 days of age, to ratio 119 against the highest competition of contemporary group pen mates in the business. He is a 6.5 frame power bull with massive length of body.
- His dam, **Blackbird Scheckel B84**, is a high ratioing, fertile, productive and heavy milking cow in our herd. She has seven calves on record with average birthweight of 79 pounds, weaning ratio of 109, yearling ratio of 105, IMF ratio of 112, ribeye ratio of 102.

LOT #57 JJ SCHECKEL *Top Cat* K938

Birth date 4/10/2022 | Reg # 20438291 | Tag # K938

- K938 is another big time performance bull that earned huge weaning weight and yearling weight ratio measurements. He is a rare direct natural son of one of our best donor cows, read below.
- His sire, **JJ Scheckels Big Spread H826**, our bred and raised herd bull that has proven himself as he went to Midland Bull test and won Champion #1 efficiency bull, while also scoring in the top 10 for growth out of over 600 others in competition. He ate less, and gained more, than any other bull in the competition, which is the largest 3rd party bull test in the United States. Efficient gain is where profits are made; he does it better than any.
- His dam, **Blackcap May Scheckel F4136**, is our 2nd high value donor cow and full sister to the 10 million dollar producing breed legend, **SAV Blackcap May 4136**. **Blackcap May Scheckel F4136** is adding a touch of frame, and also producing top weaning weight calves every year. She has sent several sons to Midland Bull Test with off the chart's performance, and is leaving beautiful producing daughters.

- Lady Scheckel H784 — SAV Resource 1441
- Lady Scheckel E232 — SAV May 2397
- Lady Scheckel C37 — R B Tour Of Duty 177

- K943 is another big time performance bull that earned positive weaning weight and yearling weight ratio measurements. He has EPD's in the top 5% of the breed for weaning and yearling weight performance. He has a Neogen DNA panel that is showing him in the top 1% for weaning weight, top 3% for yearling weight, carcass weight, and mature weight - this DNA panel is super rare to achieve.
- His sire, **SAV Prescott 9653**, came from the #1 leadoff bull group at the 2020 Schaff Sale, and has served as a J.J. Scheckel herd bull since. He had an individual weaning weight of 900 pounds and yearling weight of 1,406 pounds. He scanned a ribeye size of 15.7" and a 118 ratio for IMF.
- His dam, **Lady Scheckel H784**, is a beautiful cow in our herd. She has two calves on record with an average birthweight of 85 pounds, weaning ratio of 102, yearling ratio 105, and ribeye ratio of 116.

- K952 is another big time performance bull. He is J.J. Scheckel designed to make the type of feeder cattle the industry demands with extra muscle, length, performance, and yield.
- His sire is **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 is an awesome and special young sire raised in our program. He is a 6 frame bull who weaned at 886 lbs with a yearling weight of 1,400 lbs. He is a past Midland Bull Test graduate who we bought back to use in our program; he was the #1 final test weight bull out of 600 from the best seedstock producers in the country, he also scored in the top 5 for average daily gain, and weight day average categories. What's even more incredible, he did all of this while also placing in the top 10 for measured efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- His dam, **Lady Scheckel G568**, is a young SAV Resource 1441 daughter in our herd with two calves on record and average birthweight of 96 pounds.
