		└ ONEills Delia 703

- JJ Scheckel Duker M232 won the 2025 World Champion Efficiency Bull at the World's largest bull test, Midland Bull Test in Montana.
- He is out of a cow, **Oneil's Delia 785**, that had a son win Champion two years in a row for us at Midland, each bull from different sires, something never done in the 60 year history of the Midland Bull Test.
- Duker M232 was the highest gaining, most efficient bull out of over 600 on test from the best seedstock operations in the country. All proven with computerized tags and weighted feeding. He was 25% more efficient than the test average and beat every single bull of every single breed. He also gained 15% more weight than the test average.
- Duker M232 is a bull that will transmit superior feeding efficiency traits and high-quality gain characteristics into his offspring. We look at him as more of a terminal bull for that reason.
- Duker's dam, **Delia 785**, was a large 7 frame cow, and maternal sister to the famous Iowa bull, **Oneills Expedition**. Her traits will pass down added frame.

Dam, ONEills Delia 785

Maternal Genetics, ONEills Expedition
