HE SELLS!

Along with 40+ stout, 18 month old virgin bulls
just like him selected from the top end of our herd.

We'd sure love to have you
join us in person, enjoy a great meal
and drinks, while watching a great
sale led by World Champion
Auctioneer, Matt Lowery!

Our live sale is held in our 125-year-old heated barn
at our Bull Development Farm.

Sale Day

BIDDING OPTIONS

1 LIVE IN PERSON

There is nothing like the excitement of a live auction experience, viewing the cattle, enjoying an amazing meal and drinks, meeting old and new friends, and listening to a world class auction in our 125 year old heated barn.

2 LIVE ONLINE BIDDING

Sale broadcast on 3 online platforms: DVAuction, Superior Auction, and LiveAuction.TV.

Whatever platform you choose, we recommend **registering a week in advance** to make sure you have registered bidding privileges. Go directly to each platform's website or call them directly for registration instructions. Register for our individual sale in advance of sale day.

3 LIVE PHONE BIDDING

You may contact any **sale contact numbers listed on page 10** of this catalog for live phone bidding. Or, if you are a registered bidder with any of the online platforms, reach out to them for phone bidding method and they will help you.

4 ORDER BUY / WE WILL BUY A BULL FOR YOU

Leave your pre-auction order with Josh Scheckel at 563-590-9903 or Kurt Schaff at 816-520-6447. They will bid on **your behalf** just like you were in attendance at the sale, to a pre-determined bid price of your choice. Money back sight-unseen guarantee on all bulls bought in this manner.

*If you need help in any way - call
Josh Scheckel - 563-590-9903*

The J.J. Scheckel Program

WHAT SETS US APART?

- ◆ **3 Time World Champion** Efficiency of Gain bulls at the world's largest bull test, Midland in Montana, competing against over 600 of the best bulls in the country from seedstock operations around the USA.
- ◆ **Bull Foot Pictures** in our sale catalog, one of the only programs in the entire world doing this.
- ◆ **No Trimming** of any foot, on any bull in this sale.
- ◆ **Bulls Developed** on low inclusion, mid-energy supplement and pasture.
- ◆ **Breed Leading** Breeding Season Warranty.
- ◆ **Breed Leading** Multi-Bull Purchase Program.
- ◆ **Breed Leading** Sight-Unseen Guarantee Program.
- ◆ **Free Delivery** to sale customers.
- ◆ **No Photoshop** policy on sale pictures.
- ◆ **AHIR** Angus herd improvement records maintained.
- ◆ **High Maternal Focus.**
- ◆ **High Focus on Foot and Udder Quality.**
- ◆ **Every Animal** in our herd is **DNA Tested** for Guaranteed Parentage.
- ◆ **One Ratio Group** for the entire herd, no splits to drive up ratios.
- ◆ **Hip Heights** collected at every stage of development.
- ◆ **Scrotal Circumference** measured.
- ◆ **Semen Tested.**
- ◆ **Udder Scored Yearly** at calving on cow herd.
- ◆ **AI Breeding** and embryo production yearly.
- ◆ **World Class Herd Bull Battery** maintained, Semen sales.
- ◆ **Carcass Ultrasound** performed on all yearling calves.
- ◆ **Cow Production** records and rations maintained.
- ◆ **Herd Vaccinated** and tested yearly for infectious disease.
- ◆ Our **Herd Pressured in an Extreme Environment**, Cold, snow, ice, heat, humidity, mud, high insect pressure, steep rocks and bluffs.

ANGUS BREEDER

FOUNDATION in FUNDAMENTALS

Welcome customers, friends and fellow cattlemen!

We again, humbly welcome you to our 2026 Annual Black Friday Production Sale! The theme this year, like every year, is promoting our cattle that have a **foundation in fundamentals and real substance**. We breed cattle based on real world production records. In a world of smoke and mirrors, flashy marketing, edited pictures, and relying upon EPD numbers alone, we want to assure you that our seedstock operation is still putting in the **real actual work and is rooted in real substance**.

We still perform intense and complete Angus herd improvement records, measurement data, and guidelines on our herd, including: real Birth Weights, real Weaning Weights, real Yearling Weights, real carcass ultrasound scans for Marbling, Fat, and Ribeye Size, real Scrotal measurements, real Hip Heights, real Udder Scores, real Feet Scores, real Temperament Scoring, real Production Records on cows, and so much more! This takes a lot of real work and commitment. Furthermore, along with these **real measurements** that we perform, every single animal we own is DNA tested for parentage verification, and full-panel performance tested via DNA as well to increase EPD accuracy.

We cull extremely hard for any animal in our herd that has displayed poor feet, poor udders, poor temperament, and poor fertility, period. We can say that after 20 plus years of aggressively growing our registered herd, and culling extremely hard year after year, every single animal still breeding and walking on our farm has earned it the old fashion way. We have as solid and sound of a herd as we have ever had and are proud of the herd we have built. We did this through real work. **There is no substitute for boots-on-the ground, real production measurements, and time.**

All of our sale pictures in this catalog are 100% real, no photoshop!

The J.J. Scheckel Angus program has always strictly focused on breeding, promoting, and improving, a type of power-cow that is of super high-capacity: big-barrelled, big-boned, big-footed, extra-wide, long, thick, and deep, while being balanced in her look and possessing original Angus breed character. She is solid and sound, she possesses the perfect udder, perfect feet, easy fleshing, all in a moderate frame size. These are the kind and type of base cows that stand up in our tough environment, while delivering the extra thick and heavy-weight calves we seek, and our customers seek, at weaning and beyond.

The breeding bulls created from our cow herd will go on to make calves for our commercial cattlemen customers, that will wean extra pounds, then go to the feedlot, and perform among the top in the industry on both gain, and grade, with the genetic ability to meet high-quality standards and earn premiums for our customers.

The heifer calves retained from these breeding bulls will carry forward the genetics to replicate these traits of economic importance in ensuing generations to come.

To move the needle forward for real improvement, we must realize that everything created, for generations to come, is a by-product of that seedstock cow. She has got to be nothing less than great in all the relevant traits of importance. This is more than numbers, more than growth alone, more than carcass alone, more than milking ability alone. She has to be the complete balanced package that earns herself a high-ratioing production record of success the old fashion way. **This game is still won year after year in the pasture.**

If you want to improve your own herd, we feel its important to look at seedstock outfits that are putting in the real work and rooted in real substance with a foundation in fundamentals.

Thanks for looking at our program and if you ever need anything, don't hesitate to call, text or email me anytime!

Josh Scheckel

In any business,
it's the
People
that make the
difference.

THANK YOU!

We would like to say thanks to all of our vendors, veterinarians, and support employees who help with the Angus business.

I would like to especially thank full time farm employee, **Kenny Lundin**. He does a fantastic job, works 7 days a week, and always has a great attitude. I could not operate the Angus business at this level without him.

Another thank you goes to **Steph Medinger**, who handles our office records and paperwork.

Thanks to **Spencer Meyer**, who will help grow our program into the future.

Thanks to **Matt Meyer**, who is integral in helping process new calves and chute work as needed.

Thanks to **Kristy Howell**, who performs all of our graphic design, and website creation and updating.

Thanks to **Trevor Stillmunkes**, **Ronnie Trenkamp**, and **Maverick Scheckel**, who help around the farm and with chute work as needed.

Full-time employee, **Kenny Lundin**
works 7 days a week
helping to take care of the herd.

 **J.J. SCHECKEL**
ANGUS BREEDER

What is the **PERFECT ANGUS COW?**

That's a question respectfully best answered by each individual based on their individual goals, with no right or wrong answer.

For us here at J.J. Scheckel, it's clear and simple to define what we are focused on. A perfect cow isn't a number, glossy picture, hyped-up prospect, or an EPD profile. That stuff means very little in our program.

The perfect cow to us would be the one that trumps all the talk in the world. She's the one that's already been there, done that. She is 14-plus years old, breeds back on time every year, is easy to look at, displays that original Angus breed character, is easy fleshing and easy doing, long bodied, deep sided, naturally thick, slick haired, moderate framed, and maintains a perfect udder, foot, and temperament. She weans a heavy calf every year that possesses that same length of body, width, depth, and shape. The type and kind of calf that will go on and be successful as replacement seedstock, lead in the feedlot, and/or the type of beautiful heifer calf that you wished you had 100 more of - one that will replicate the process all over again. Problem free, drama free.

We breed specifically to replicate this type and kind of special female.
That is the #1 focus and goal of our program.

Ideal 5361

The Evolution of our Brand Tag Line

FOUNDATION *in* FUNDAMENTALS

J.J. Scheckel is a non-flashy, meat-and-potatoes type of operation that started hardscrabble from zero, way before our Heavy Equipment businesses became highly successful. Over 25 years ago, Josh Scheckel started with no employees, no inheritance, no cattle, no family acres, no equipment, no hand-me-downs, no nothing besides a high work ethic and a bank loan that looked impossible and all uphill, on one of the roughest and most remote farms in Bellevue, Iowa. There was no electricity, no well, junk fencing, no cement, and no buildings besides a 120-year-old dilapidated barn and not even a road to get to it. Josh worked nights and weekends for a year and a half clearing and building a half-mile lane through the rock bluffs and heavy timber to access the place. We worked with what we had and built it up one piece at a time into something functional that worked for us. Today we have four farms but still use the original place as our wintering farm.

The Cattle Business started with 40 commercial cows on that original farm. Years later, Josh purchased 12 registered heifers from a dispersion sale to establish our purebred herd with. We faced blow after blow after blow, but Josh had no quit in him. That rough road we encountered early on shaped our thinking and our entire existence today into the importance of the “*Foundation in Fundamentals*” we talk about so much.

Josh personally felt the pain of all the problems early on - the stress and uncertainty of making the payments, the laying in the mud and snow trying to get a calf to suck a terrible udder, the prolapses, open cows, pulling calves, the tall-frame, hard-doing cows, the 4-year-old cows we retained and depended on that later failed to breed, udders that went bad, feet that went bad, the terrible temperaments and high-headed fence jumpers. All of the things that make the farm unprofitable, unenjoyable, and unsustainable we went through and experienced firsthand ourselves, and were the very reason we entered the registered seedstock business to begin with - to improve our cattle and the cattle of our customers.

It's not just a tagline for us, the J.J. Scheckel “*Foundation in Fundamentals*” means something dear to our core. These cattle have always had to work for us to merely survive. It was life or death for the existence of our farm operation, and the cattle had to be right in every way. We realized quickly we needed those good-doing cows with extra length, width, depth and mass of body, with good dispositions, good udders, good feet, longevity, high fertility and fleshing ability on grass. The resulting calves from these types of cows had to top the market or leave beautiful heifers to replicate the process.

Strict attention to those core fundamentals will keep you out of the ditches, profitable and thriving into the future. There is no industry EPD or number that you can pick from that will automatically get you there, absolutely none. All the talk in the world won't get you there; the real game is still won or lost in the pastures. It takes years and years of strict breeding, production records, and management with the right bloodlines, the right type and kind, and the right focus. These are the seedstock outfits the commercial man will want to align with and do business with. The very ones that are breeding bloodlines and cattle specifically for the commercial man's success, because they have been there themselves.

ANGUS PRODUCTION SALE

FRIDAY, NOVEMBER 27, 2026

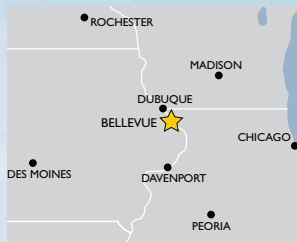

ONSITE AUCTION *Bellevue, Iowa* 12:00 NOON

SALE LOCATION

Farm Address: 21551 375th Avenue, Bellevue, Iowa 52031

DIRECTIONS

The auction location is at our **Bull Development Farm, 21551 375th Avenue, Bellevue, Iowa**. This farm is located just 1 mile from the J.J. Scheckel Heavy Equipment business, whose address is 21582 IA 62, Bellevue. You can come to this business address off highway 62, then follow the posted signs a short distance west to the sale site located just off the gravel road, 375th Avenue in Bellevue.

COMMENTS FROM THE SALE MANAGER

J.J. SCHECKEL ANGUS PRODUCTION SALE - THE ANNUAL BLACK FRIDAY EVENT!

Dear Cattlemen,

Plan now to be on site on Black Friday, November 27, 2026 for the J.J. Scheckel Angus Annual Production Sale. This special event which again happens live and in person will also include online bidding capabilities. Selling will be more than 50 registered Angus bulls and females from the top end of the program. They come with the nation's best multi-bull purchase discount and sight-unseen guarantee as well as free nationwide delivery and breeding warranty.

Based on a foundation of the fundamentals, J.J. Scheckel has become known for building a sturdy maternal herd on the rocky bluffs of Iowa while breeding for extra length, depth and mass of body with fleshing ability and a balanced and moderate frame. You can expect solid feet, udders, longevity and high fertility. For a period of more than 20 years, the Scheckel family have owned and operated the nearby United Livestock Auction which gave Josh a valuable perspective into the cattle business. In 1996 Josh founded J.J. Scheckel Heavy Equipment which has grown into a reputable business with an international presence. Located on the Mississippi River Valley, the Scheckel Angus cow herd are tested under trying environmental conditions with an emphasis on identifying the best of the best. Consequently, the cattle produced in this program are designed and intended to work in a broad range of conditions for valued customers. Josh and his wife Angie have seven children that they raise on their family farm outside of Bellevue, Iowa where their Angus herd calls home.

A stout set of 18-month old virgin bulls will sell with highlights including JJ Scheckel Major 25375, an outstanding son of Baldridge Badger from the Blackcap May family. Other noted sires include DL Zoom, Ellingson Profound and Sitz Stellar 726D. A set of top end registered bred heifers sell carrying the service of leading sires including SAV Courage 3003.

Leading up to the sale, please feel free to reach out to Josh Scheckel by phone or come by for a pre-sale visit to view the cattle and get acquainted. It is a great pleasure to assist with this important event hosted by an operation dedicated to your success. Additionally, please don't hesitate to contact us at the American Angus Hall of Fame if we can be of assistance in any way. We are here to serve.

Sincerely,

TOM BURKE

SALE TERMS

This is a live auction with live auctioneer and bidding on-site at our farm in Bellevue, Iowa. The sale is also broadcast live on Bid.SuperiorLivestock.com, LiveAuctions.TV, and DVAuction.com

SALE STARTS FRIDAY, NOVEMBER 27TH AT 12:00 NOON, CENTRAL TIME.

All cattle will sell under the suggested terms and conditions of the American Angus Association.

All on-site bidders and buyers will settle up the day of the sale. J.J. Scheckel office staff will contact all online buyers on the Monday following the auction to send invoices, arrange payments, and collect delivery information.

PAYMENT

We will accept check, cash, or credit card for payment.

FREE DELIVERY NATIONWIDE

We will offer free delivery on any animal selling for \$7,500 and up, to any location in the U.S.

After payment has been received, we will deliver to a central livestock market, or sale barn of your choice, that is open during regular business hours. At the time of delivery, you are then responsible for the care, feed, water, and pick-up of the cattle.

SIGHT UNSEEN GUARANTEE

If you purchase an animal sight-unseen, and for any reason are unhappy with your purchase upon delivery, we will refund your money 100%, provided you:

- #1- turn cattle down at time of delivery, BEFORE delivery truck leaves site, or
- #2- return the cattle uninjured to our farm yourself, no later than 3 days after delivery.

MULTI-BULL PURCHASE DISCOUNT

Progressive multi-purchase volume discount for any bull selling for \$6,000 or more, purchased by the same buyer.

\$400 per head discount will be applied to the invoice on the 2nd Bull purchased through 5th Bull purchased by the same buyer.

\$700 per head discount will be applied to the invoice on the 6th Bull purchased through 10th Bull purchased by the same buyer.

\$1,000 per head discount will be applied to the invoice on the 11th Bull purchased on up, by the same buyer.

Progressive discount applied per bull to individual buyer only, no grouping by multiple buyers. This discount is for bulls only and will reflect on your invoice.

MORTALITY DEATH INSURANCE

Animal death is not covered by our Breeding Season Warranty. If you want to protect yourself financially from a death, it is your responsibility to purchase the full Bull Mortality and Accident Insurance through a partner company of ours who will administer the policy directly with you. The plans generally cost 10-15% of the sale price of the animal. If interested, this needs to be purchased at the time payment is arranged post-auction, before delivery. Please let us know if you want this at time of invoicing, and we can send you a contract from the insurance company.

CATTLE DEVELOPMENT

Since weaning, these cattle have been on a medium growth, high-fiber based program consisting of pasture, hay, corn, gluten pellets, Vitamin ADE, and free choice salt and minerals. We do not feed a finishing-corn based diet to our developing seedstock, so the weights posted on each animal is not maximum gain, but rather medium gain while being developed.

PARENTAGE VERIFICATION & GENETIC DEFECT-FREE

Each animal selling is DNA tested and 100% parentage verified using Zoetis 50K, Neogen, or Angus GS DNA. Each animal selling is free and clear, by pedigree, of any known genetic defect.

FOOT SCORING

Feet and leg structure is critically important to us for the longevity of our cattle. Our breeding program screens our entire herd yearly based on the chart below. Any and all animals not meeting this acceptable range are culled from our herd.

Every sale animal in this catalog has been pre-screened based on the chart below. **There has been absolutely NO foot or claw trimming on any animal in this sale.**

RETAINED OWNERSHIP

J.J. Scheckel reserves and retains one-half revenue sharing semen interests on each bull selling. Full possession and full salvage value stays with the buyer unless otherwise noted.

FIRST BREEDING SEASON WARRANTY

There is no question bulls are prone to injury. Every bull we sell comes with a First Breeding Season Warranty. A breeding season is defined as 60 days after first turnout. We do this to maintain **100% satisfaction** and fairness with our customers. This means the bull you purchase will be warrantied if he is found to not be a satisfactory breeder by a vet. This includes a broken penis, severe lameness, or any injury that prevents him from being able to breed your cows.

We operate on the honor system, offering an easy resolution to injured bulls. After we receive your vet confirmation of injury, you send the injured bull to kill market yourself, providing us with the receipt. We will place a credit on your account for future sale purchases in the amount you paid for the bull at our sale, less the salvage value from the kill market. This is not a cash back situation; this is a credit that will be on your account here for future sale purchases.

To qualify for the warranty, we must first be notified of the problem. Your vet will need to call us for the reason of injury, and the bull must be alive for this warranty to be in effect. We cannot cover or warranty a dead bull for any reason whatsoever, you will want to purchase outside mortality insurance if you wish to protect yourself from a dead bull for any reason.

What this warranty means to you is that we are trying to be as fair and good as we can to our customers. We want happy, repeat customers.

BULLS

NOTICE:

All bulls will sell in the catalog order as printed. Besides the first few headline bulls, you'll find equally outstanding bulls from front to back. They have not been pre-sorted for the sale or catalog in any way, other than keeping their sire groups together.

Some of the very best bulls in this sale will be located in the center and even the very back of the lot numbers in this catalog.

Bull Sale Lot EPD Highlights

HEIFER SAFE BULLS

Via EPD Prediction. BW +1.5 or Less, or CED +6 or More.

Birth Weight (BW) predicts the expected difference in pounds in average calf Birth Weight between a sire's progeny and the progeny of other sires. **Calving Ease Direct (CED)** predicts the expected difference in the percentage of unassisted births when a sire is bred to first-calf heifers.

Criteria Met	Sale Lot Numbers
BW + 1.5 or Less, or CED +6 or More	2, 3, 4, 7, 10, 11, 14, 19, 23, 26, 27, 37, 38, 46

FUNCTIONAL LONGEVITY (FL)

FL, Functional Longevity. The cow is the foundation of your herd. Her ability to produce and raise a calf year over year creates consistency in our operations and in turn increased value. This EPD predicts the number of calves a sire's daughter is expected to produce by 6 years of age compared to other sires in the population, or ability to stay in herd and in production without failure.

Breed Ranking	Sale Lot Numbers
Top 1%	10
Top 2%	22
Top 3%	46
Top 10%	26, 30, 45
Top 15%	7, 12, 21, 39, 43
Top 20%	13, 23, 24, 27, 33, 34, 38
Top 25%	3, 4, 41

MATERNAL VALUE INDEX (\$M)

Maternal weaned calf value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. Expressed in dollars per head, \$M estimates profitability differences in progeny from conception to weaning.

Breed Ranking	Sale Lot Numbers
Top 1%	20
Top 3%	24, 25
Top 4%	14
Top 5%	22
Top 10%	2, 13, 18, 23, 26
Top 15%	21
Top 25%	16, 17

WEANING & YEARLING WEIGHT (WW/YW)

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. **Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Breed Ranking	Sale Lot Numbers
Top 1%	2, 18
Top 10%	15
Top 15%	21
Top 20%	8, 13, 28
Top 25%	1

Real Data Facts

J.J. Scheckel Birth Weight Facts - The dams of the bulls in this sale catalog have had a combined production record of **227 calves on record**, with an average Birth Weight of **77 Pounds**.

J.J. Scheckel Weaning Weight Facts - The bulls in this sale catalog have a collected average 205 day Weaning Weight of **718 pounds**. The 2025 Angus Association average for creep fed bull calves is **665 pounds**. J.J. Scheckel bred calves are averaging **53 pounds per head above the average** of the entire Angus breed. That is real money when used by the commercial cattlemen.

- The right type and kind of bull here, out of one of our best donor cows. Major isn't the biggest stoutest bull you'll find in the sale; however, he is loaded with that hard to find 3-dimensional, explosive muscle shape while maintaining that moderate frame and easy fleshing properties. He has length of body and a huge back hip like his dam, who is one of the best top end cows on our farm. He will be a valuable female maker. We plan on using him in our program going forward with a retained semen interest. Buyer gets full possession.
- Major weaned at 795 pounds to ratio 107, and measured an IMF and Ribeye ratio of 101 and 112 at carcass ultrasound.
- His EPD's have him in top 30% Weaning and Yearling Weight, top 20% Foot Claw shape and angle, top 10% Carcass weight, top 1% Ribeye size.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **Baldridge Badger**, is a go to proven sire with an elite outcross pedigree, excellent foot quality, wide based, full of muscle, volume and dimension. He is easy fleshing and docile and continues to stamp his progeny with breed character and the same properties he carries.
- His Dam, **Blackcap May Scheckel H706**, is a beautiful and valuable donor cow for us. She is currently raising her 5th natural calf in our herd within a 352 day average calving interval while giving eggs in between. Her calves have an average Birth Weight of 73 pounds. She has progeny Weaning and Yearling Ratios of 107 and 103, with IMF and Ribeye progeny ratios of 84 and 114.

- One of the real standouts of the calf crop with off the charts performance and EPD profile both, out of a fantastic dam stemming from the famous Hoover Angus herd and former donor of ours, Erica of Ellston M231.
- On Call weaned at 807 pounds to ratio 109, with a 365 day Yearling Weight of 1,444 to ratio 120. He measured an IMF and Ribeye ratio of 110 and 103 at carcass ultrasound.
- His EPD's have him in top 1% of the Angus breed for Weaning and Yearling Weight, top 2% Weaning Index, top 3% Calving Ease Maternal and Carcass Weight, top 10% Maternal Index, Feedlot Index, and top 20% Combined Index.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **DL Zoom**, is a Genex/Alta AI bull that we didn't use until we saw him in person. DL Zoom was the most impressive bull at stud, he blew us away. He is super long, super wide and powerful, with huge quarters and a 6 frame size, a bull we felt that could be easy-fleshing and maternal, as well as powerful. He has perfect feet, legs and an extra smooth stride.
- His Dam, **Ellston Scheckel H746**, is a Payweight Plus daughter going back to the Hoover blood, out of our past donor, Erica of Ellston M231. She is currently raising her 5th natural calf in our herd with an average Birth Weight of 86 pounds. She has progeny Weaning and Yearling Ratios of 98 and 110, with IMF and Ribeye progeny ratios of 112 and 104.

Sire, DL Zoom

- Here will be a moderate-framed, right type and kind of bull to keep every female from, out of our awesome JJ Scheckel Revolution 22935 bull, who is line-bred to the legendary Rito 707 an astounding 804 times, the highest known to ever be counted in a pedigree. He displays a perfect balance of depth, width, thickness, length and breed character just like his sire.
- Titan weaned at 830 pounds to ratio 112, with a 365 day yearling weight of 1,262 to ratio 105.
- His EPD's have him in top 30% for Birth Weight, Functional Longevity, and Foot Claw.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **JJ Scheckel Revolution 22935**, is a moderate 5.5 frame bull that has tremendous natural fleshing ability, spring of rib, depth of body, muscular forearm, length, and is perfectly balanced. He is uniquely line bred an astounding 804 times to the legendary sire "Rito 707", the highest known to ever be counted. Revolution stamps all his offspring through his genetic prepotency. His daughters are the right kind and beautiful. His bull calves are stamped to look just like himself. We have used him heavy in our herd.
- His Dam, **Blackcap May Scheckel K369**, produced the 2nd highest selling bull of our 2025 sale, M250. A low Birth Weight, perfect uddered cow, she is currently raising her 3rd natural calf in our herd with an average Birth Weight of 63 pounds. She has progeny Weaning and Yearling Ratios of 103 and 100, with IMF and Ribeye progeny ratios of 100 and 101.

	75	87	41	54	38	71	70	69	39	77	82	12	35	92	94	87	20

- Here is a unique bull, and maybe the only one in the world, with the 1960's legendary maternal grand-sire Camilla Chance 37T, also know as the Canadian Colossal. This bull is super correct with that strong top line.
- He measured a 143 ratio for IMF at carcass ultrasound.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire is **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 was a 6 frame bull who weaned at 886 pounds, Yearling Weight of 1,400 pounds, a past Midland Bull Test graduate who we bought back to use in our program. He was the #1 final test weight bull out of 600 from the best seedstock producers in the country. He also scored in the top 5 for Average Daily Gain, and also Weight Day Average categories. What's even more incredible is he did all of this while also placing in the top 10 for Measured Efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of every single other bull on the largest bull test in the USA, and stands at the top of proven real world performance and efficiency.
- His Dam, **Camilla May Scheckel H760**, has an interesting back story. This bloodline can not be recreated or attained anywhere else in the world. We created her by sourcing the rarest semen available from the 1960's famous legendary Angus bull, Camilla Chance 37T, the "Canadian Colossal", with our #1 donor cow, Blackcap May Scheckel D4136. H760 is currently raising her 5th natural calf in our herd with an average Birth Weight of 76 pounds. She has Progeny Weaning and Yearling Ratios of 95 and 94, with IMF and Ribeye progeny ratios of 108 and 87.

One of the Heaviest Bulls on the Sale!

- A heifer bull here with low Birth Weight EPD and +13 Calving Ease Direct. This bull has a lot of muscle shape and a strong top line. He comes from a strong maternal line.
- Stellar weaned at 747 pounds to ratio 101, with a 365 day Yearling Weight of 1,257 to ratio 105. He measured an IMF and Ribeye ratio of 119 and 111 at carcass ultrasound.
- His EPD's have him in top 10% Low Birth Weight and Calving Ease, with a top 30% Carcass Weight.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **Sitz Stellar 762D**, is a widely recognized and proven AI bull known for superior foot quality, structural soundness, muscle shape, and high performing daughters with great udder quality.
- His Dam, **Med Rock Miss Aviator 745**, is a high-production and fertile Musgrave Aviator daughter. She is currently raising her 7th natural calf in our herd with an average Birth Weight of 74 pounds. She has progeny Weaning and Yearling ratios of 96 and 99, with IMF and Ribeye progeny ratios of 119 and 111.

Sire, Sitz Stellar 726D

- This bull is top 1% in the Angus breed for Maternal Value Index. You will want to keep every single daughter. His dam's side is known for easy fleshing, grass efficient cattle. He scanned one of the best carcass ultrasounds of the entire sale with high IMF and Ribeye size.
- Black Jack weaned at 736 pounds, with a 365 day Yearling Weight of 1,144. He measured an IMF and Ribeye ratio of 168 and 112 at carcass ultrasound.
- His EPD's have him in top 1% of the Angus breed for Maternal Value Index, and top 10% Foot Claw structure.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **DL Zoom**, is a Genex/Alta AI bull that we didn't use until we saw him in person. DL Zoom was the most impressive bull at stud. He blew us away - super long, super wide and powerful, with huge quarters and a 6 frame size, a bull we felt that could be easy fleshing and maternal as well as powerful. He has perfect feet, legs and an extra smooth stride.
- His Dam, **Jauer 596 Rancher 2174 8138**, is a moderate and easy fleshing fertile Jauer bred cow. She is currently raising her 7th natural calf in our herd with an average Birth Weight of 73 pounds. She has progeny Weaning and Yearling ratios of 98 and 95, with IMF and Ribeye progeny ratios of 129 and 104.

- A JJ Scheckels Duke H810 son offering high growth and carcass quality with built-in maternal. He is a big bodied muscular bull like his sire, that will in turn sire market-leading calves and replacement females.
- Jackson weaned at 793 pounds to ratio 107, with a 365 day Yearling Weight of 1,297 to ratio 108. He measured an IMF and Ribeye ratio of 140 and 108 at carcass ultrasound.
- His EPD's have him in the top 20% of the Angus breed for Weaning and Yearling Weight, top 1% in the breed for Milk, top 10% for Docility, top 20% for Foot Claw Quality and Carcass Weight.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire is **JJ Scheckels Duke H810**, "Some talk it, he did it". H810 was a 6 frame bull who weaned at 886 pounds with Yearling Weight of 1,400 pounds. He is a past Midland Bull test graduate who we bought back to use in our program. He was the #1 final test weight bull out of 600 from the best seedstock producers in the country. He also scored in the top 5 for Average Daily Gain and Weight Day Average categories. What's even more incredible is that he did all this while also placing in the top 10 for measured Efficiency via computerized bunks where he gained more, on less inputs, than 90% of the competition. When you take all measured categories together into consideration, he beat 100% of the bulls on the largest Bull Test in the USA, and stands at the top of proven real world performance and efficiency.
- His Dam, **Ideal Scheckel L457**, is a young and high-production cow. She is currently raising her 2nd natural calf in our herd with an average Birth Weight of 80 pounds. She has progeny Weaning and Yearling ratios of 107 and 108, with IMF and Ribeye progeny ratios of 140 and 108.

Either you

- An awesome larger frame son from our World Champion Efficiency of Gain bull at the largest bull test in the World, Midland, where he dominated the test of over 600 other bulls from the best seedstock outfits in the country.
- Chopper weaned at 771 pounds to ratio 118, with a 365 day Yearling Weight of 1,166 pounds to ratio 110.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **JJ Scheckels Big Spread H826**, was our first World Champion Efficiency of Gain bull from the largest bull test in the World, Midland, where he dominated the test of over 600 other bulls from the best seedstock outfits in the country. He was a SAV Atmosphere 6600 son loaded with the muscle the Rito line is famous for, with the added power of legendary bull Dateline 7078 on the bottom side of his pedigree.
- His Dam, **Ideal 8216 of 1168 Marjorie**, is a Jorgensen bred cow. She is currently raising her 7th natural calf in our herd with an average Birth Weight of 78 pounds. She has progeny Weaning and Yearling ratios of 105 and 108, with IMF and Ribeye progeny ratios of 101 and 102.

Sire, JJ Scheckels Big Spread H826

- An awesome bull with smaller frame size, low Birth Weight heifer safe. He will pack his offspring with amazing 3-dimensional muscle shape and fleshing ability. These are the grass efficient ones, the females left behind will make super great cows.
- His EPD's have him placed in the top 20% for low Birth Weight and Udder Quality.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **JJ Scheckels Power Aid H812**, was a bull known for bulging 3-dimensional muscle. He was super thick, good footed, and easy fleshing in a smaller 4.8 frame size. He was a rare full brother in blood to the legendary and famous SAV Resource 1441, and SAV Renown 3439. This bull packs his offspring with that muscle in a smaller frame size, extremely easy fleshing, grass efficient type cattle, while his daughters in our herd are some of the very best picture perfect young cows we have.
- His Dam, **Lady Scheckel K312**, is a fertile and high producing young cow currently raising her 2nd calf in our herd with an average Birth Weight of 65 pounds.

- A great bull with smaller frame size, low Birth Weight heifer safe. He will pack his offspring with amazing 3-dimensional muscle shape and fleshing ability. These are the grass efficient ones, the females left behind will make super great cows.
- His EPD's have him placed in the top 1% of the Angus breed for Energy Efficiency. Top 3% Foot Claw Quality, top 20% Ribeye Size, Heifer Pregnancy, and Functional Longevity.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **JJ Scheckels Power Aid H812**, was a bull known for bulging 3-dimensional muscle. He was super thick, good footed, and easy fleshing in a smaller 4.8 frame size. He was a rare full brother in blood to the legendary and famous SAV Resource 1441, and SAV Renown 3439. This bull packs his offspring with that muscle in a smaller frame size, extremely easy fleshing, grass efficient type cattle, while his daughters in our herd are some of the very best picture perfect young cows we have.
- His Dam, **Ideal 1352 Dorinda of E1674**, is a very uniquely and special bred cow with her sire being the old school bull from 1976, Tail N Emulous 1674. She is currently raising her 3rd calf in our herd with an average Birth Weight of 68 pounds.

Lot 38, Actual Foot Images

A scenic view of the Mississippi River at sunset. The sun is low on the horizon, casting a warm, golden glow across the sky and the water. A long dam or bridge stretches across the river in the distance. The foreground is filled with lush green trees and bushes. The sky is a mix of blue, orange, and yellow, with some clouds. The overall mood is peaceful and majestic.

Gratitude turns

- A son from our 2024 World Champion Efficiency of Gain bull at Midland. Here is the type of bull with genetics to make the very best feeder cattle in the country.
- Affirmative weaned at 704 pounds to ratio 108, with a 365 day Yearling Weight of 1,082 to ratio 102. He measured a IMF and Ribeye ratio of 119 and 90 at carcass ultrasound.
- His EPD's have him placed in the top 20% for Docility.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **JJ Scheckel Montana L107**, was the 2024 #1 World Champion Efficiency of Gain bull at the world's largest bull test, Midland, competing against 600 other bulls from the best seedstock in the country. Montana L107 dominated the test with a 126 Efficiency Ratio or 26% higher than the test average. He gained more, and ate less, and beat every single animal, of every breed. Montana L107 is noted as a larger 7 frame bull, with added length. He is a superior breeder on pasture covering a lot of ground with big fluid strides, and from a dam that created two back-to-back World Champions for us, a feat never done in over 50 years of Midland testing.
- His Dam, **Ellston Scheckel L451**, a beautiful young cow, is currently raising her 2nd natural calf in our herd with an average Birth Weight of 73 pounds. She has progeny Weaning and Yearling ratios of 108 and 102, with IMF and Ribeye progeny ratios of 119 and 90.

- A bull out of one of the very best donor cows on our farm and featured in our advertising. This bull is loaded with muscle and shape. You will want to keep every daughter he makes.
- Turbo weaned at 680 pounds to ratio 104, with a 365 day Yearling Weight of 1,104 to ratio 106.
- His EPD's have him placed in the top 10% of the Angus breed for Functional Longevity and Fat Cover, also known as the Fleshing trait.
- Like all of our Sale Bulls, he was developed on a large grass pasture, and a low inclusion, mid-energy feed supplement fed in bunk.
- His Sire, **SAV Regulator 9286**, was a super long bodied, 6 frame herd bull for us. He was the #1 Scrotal Size bull of over 400 head at SAV, while also scanning a top 3 in Ribeye Size of 18" at ultrasound. Regulator weaned at 988 pounds to also put him in the top 10 of 400+ bulls at Schaff. Regulator maintained top 1% Scrotal EPD, top 2% Ribeye Size EPD, and top 20% Growth EPD's.
- His Dam, **Ideal 5361 of 7773 Erilou**, is a model Angus cow that we use often for advertising, and one of the very best cows in our herd. She earned her way into our donor pen by her personal production record with no special treatment. A moderate sized cow, she has maintained perfect feet and a perfect udder. She always brings in one of the best calves and produced a past herd bull for us, JJ Scheckel Big Track K927, a 6 frame bull who weighed 1,700 at 365 days of age. She is currently raising her 9th natural calf with an average Birth Weight of 79 pounds. She has progeny Weaning and Yearling ratios of 102 and 105, with IMF and Ribeye progeny ratios of 91 and 103.

- A beautiful heifer here - like all of them selling, we would love to keep her.
- She weaned at 701 pounds to ratio 104 at Weaning, 108 ratio at Yearling, and measured a big 14" Ribeye at ultrasound to ratio 115.
- Her EPD puts her in the top 1% Functional Longevity in the Angus breed.
- She developed on grass pasture, not a feedlot, and she bred up first service AI.
- AI bred to **SAV Courage 3003**.
- **Confirmed due to calve Feb. 1st, with sexed heifer pregnancy at 90% accuracy on sex.**
- Her sire, **Rito 0040 Magnum of Ideal**, is a line bred bull tracing to **Rito 707** 350 times, and 472 times to the great female sire, **Skyandmere 2058**. Magnum is a **SAV Renown** son with a wide base, deep, and plenty of spring of rib. He is masculine, well crested, and full of red meat.
- Her dam, **Ideal 9414 Lady of Encore**, is line bred Lady family. This cow is currently raising her 6th calf in our herd with an average Birth Weight of 72 pounds. She has progeny Weaning and Yearling ratios of 102 and 109, along with progeny IMF and Ribeye ratios of 103 and 106.

3 TIME WORLD CHAMPION

BULL TEST STATIONS **J.S**

For our first 20 years of purebred Angus breeding, we openly tested our genetics at test stations across the USA, including Iowa Cattlemen's, Indiana, Tri-County Steer Futurity, Minnesota, and many more. This included the biggest of them all, the world's largest, Midland Bull Test in Montana, where we won **World Champion Efficiency Bull for three separate years**, by three different sires and out of two different cows - a feat never accomplished in the previous 60 years of testing.

Through years of testing, we know our cattle can perform and how they perform. We know the specific type and kind it takes to be the very best in the country at a given trait.

*“The game is still won, and
still lost, in the pastures.”*

FROM A COWHERD MANAGED WITH STRICT ATTENTION TO THE MATERNAL FUNDAMENTALS.

Fertility - Feet - Fleshing - Udders - Longevity
